

CHILD-CENTRIC WIFI MONITORING AND CONTROL SYSTEM WITH LEARNING ACCESS MANAGEMENT AND AUTOMATED REPORTING

Test Session Information

Date: _____

Tester Name: _____

User Role: Child

Device Used: - ☐ Android phone ☐ iPhone ☐ Tablet/iPad ☐ Laptop/Desktop

For child respondents: Child age (exact)_____

Consent Statement:

I confirm that my participation is voluntary. I acknowledge the following:

- My responses will be used exclusively for this thesis and related academic assessment, and for no other purpose.
- I consent to the use of all information gathered through this instrument including numeric ratings, written answers, and session or observer notes where applicable for analysis, interpretation, and inclusion in the thesis document, oral defense, supervisory review, grading, and other outputs required or customary for completion of this academic program.
- I grant permission for that material to be retained, reproduced, and cited in thesis chapters, appendices, presentation materials, and institutional thesis archives or repositories, for scholarly and degree-related purposes, without separate approval for each routine academic reuse.

Name/Signature (optional): _____

Date: _____

Methodology (how the survey was conducted)

- The child (ages 7-9) was the direct respondent on the printed form. The session followed Meloncon et al. (parent in a separate room; neutral researcher present). The researcher read the opening script once, then read each question aloud only if the child needed assistance (for example, difficult words); the child still chose and marked Yes/No (or Oo/Hindi) without the parent coaching answers during the items.

Test Case – User Interface Child Portal (Child)

	Yes	No
1. After I finish the quiz or the video on the portal, I can tell that I earned more time to keep using the internet. (*Pagkatapos kong tapusin ang pagsusulit o ang video sa portal, alam ko na may karagdagang oras ako para magpatuloy sa internet.*)		
2. On the portal, I can see how much internet time I have left. (*Sa portal, nakikita ko kung magkano pang oras ang natitira sa akin sa internet.*)		
3. On the start screen, I can tell which part is for the quiz and which part is for the video without getting confused. (*Sa unang screen, alam ko kung saan ang pagsusulit at kung saan ang video nang hindi ako nalilito.*)		
4. When I tap pictures or buttons on the portal, I notice right away that the screen responds to my tap for example, something lights up, changes, or moves a little. (*Kapag pumipindot ako ng larawan o button sa portal, agad kong napapansin na tumutugon ang screen sa tap ko—halimbawa, may umiilaw, nagbabago, o gumagalaw nang kaunti.*)		
5. If I tap the wrong thing on the portal, I can still return to where I was or to the main choices without getting stuck. (*Kapag mali ang napindot ko sa portal, makakabalik pa rin ako sa dati kong lugar o sa mga pangunahing pagpipilian nang hindi ako naipit.*)
