

CHILD-CENTRIC WIFI MONITORING AND CONTROL SYSTEM WITH
LEARNING ACCESS MANAGEMENT AND AUTOMATED REPORTING

Test Session Information

Date: _____

Tester Name: _____

User Role: Parent

Device Used: - [] Android phone [] iPhone [] Tablet/iPad [] Laptop/Desktop

Consent Statement:

I confirm that my participation is voluntary. I acknowledge the following:

- My responses will be used exclusively for this thesis and related academic assessment, and for no other purpose.
- I consent to the use of all information gathered through this instrument including numeric ratings, written answers, and session or observer notes where applicable for analysis, interpretation, and inclusion in the thesis document, oral defense, supervisory review, grading, and other outputs required or customary for completion of this academic program.
- I grant permission for that material to be retained, reproduced, and cited in thesis chapters, appendices, presentation materials, and institutional thesis archives or repositories, for scholarly and degree-related purposes, without separate approval for each routine academic reuse.

Name/Signature (optional): _____

Date: _____

Methodology (how the survey was conducted)

- The parent was the direct respondent while using the system's parent dashboard (live or as deployed for the study). The researcher read items aloud when the parent requested help (for example, wording), without suggesting which rating to choose.

Instructions for Parents:

1. Answer each item based on actual experience during the session.
2. Use the scale below for rating items:

5 - Strongly Agree
4 – Agree
3 – Neutral
2 – Disagree
1 - Strongly Disagree
3. If an item is not applicable to your role, mark ****N/A****.

Test Case — User Interface Parent-Dashboard (Parent)

	Strongly Agree (5)	Agree (4)	Neutral (3)	Disagree (2)	Strongly Disagree (1)	N/A
1. I can monitor visited websites of assigned child devices, and I can manually flag and block selected websites. (*Kaya kong subaybayan ang mga binisitang website ng mga device ng anak na naka-assign sa akin, at kaya kong manu-manong i-flag at harangin ang mga piniling website. *)						
2. The system redirects the child device to quiz/video activity and only continues internet after required completion/passing. (*Inililipat ng sistema ang device ng bata sa quiz o video, at magpapatuloy lamang sa internet pagkatapos matapos o pumasa ayon sa itinakda. *)						
3. I can set and enforce internet schedule and duration limits for each assigned child device. (*Kaya kong magtakda at ipatupad ang iskedyl at tagal ng paggamit ng internet para sa bawat device ng anak na naka-assign sa akin. *)						
4. I receive real-time notifications for time limit reached, flagged-site visit, blocked-site attempt, and new-device connection. (*Tumatanggap ako ng abiso agad-agad kapag naabot na ang limitasyon sa oras, may binisitang site na minarkahan ko, may tangkang pagbisita sa hinarang na site, at may bagong device na kumonekta. *)						
5. I can monitor the total time each child device spends online. (*Kaya kong subaybayan ang kabuuang oras na ginugol online ng bawat device ng anak. *)						
6. The dashboard provides clear daily, weekly, and monthly reports (usage, visited sites, flagged/blocked attempts, and bandwidth). (*Nagbibigay ang dashboard ng malinaw na ulat araw-araw, lingguhan, at buwan-buwan (paggamit, binisitang site, mga tangka sa niranggo/hinarang na site, at bandwidth. *)						
7. I can manage connected devices using block and whitelist controls. (*Kaya kong pamahalaan ang mga konektang device gamit ang pag-harang at listahan ng mga payagang device. *)						
8. I can add, update, or remove quizzes and educational videos assigned to the captive portal for my child's devices. (*Kaya kong magdagdag, magbago, o magtanggal ng mga pagsusulit at pang-edukasyong video na nakatalaga sa captive portal para sa mga device ng anak ko. *)						
9. The system works reliably at home using our local setup and PLDT modem connection for internet control and child portal access. (*Maaasahan ang sistema sa bahay gamit ang aming lokal na setup at koneksyon sa modem ng PLDT para sa kontrol ng internet at pagpasok sa portal ng bata. *)
